

MUHAMMAD HAZIQ

Senior Software Engineer

muhammadhaziq341@gmail.com • <https://linkedin.com/in/muhammad-haziq> • Lahore, Pakistan

Summary

Senior software engineer with a strong track record of leading full-stack teams and delivering enterprise-grade solutions that increase customer satisfaction and operational efficiency. Expert in driving innovation through AI tools, Agile methodologies, and modern JavaScript frameworks to deploy robust, scalable platforms supporting 200,000+ users. Recognized for boosting performance, security, and seamless payment integrations across diverse client environments.

Skills

Frontend Technologies: React.js • Typescript • JavaScript • Redux.js • Context API • Tailwind CSS • Sass • Material-UI • Bootstrap • Next.js

Backend Technologies: Node.js • Express.js • Nest.js • Restful APIs • Micro-services Architecture • Web-socket • Socket.io

Databases: MySQL • PostgreSQL • MongoDB • Redis • Sequelize ORM • Mongoose • Query Optimization • Transaction Management

Payment & Financial Systems: Apple Pay • Google Pay • Stripe • Checkout.com • TAP

Cloud & DevOps: Docker • CI/CD Pipelines • GitHub Actions • New Relic • Sentry • Axiom • Paper-trail

Testing & Quality Assurance: React Testing Library • Mocha • Chai • Jest

AI-Enhanced Development: Cursor AI • Claude 4 • ChatGPT • GitHub Copilot • Gemini

Experience

InsuranceMarket.ae™

Dubai, United Arab Emirates

Senior Software Engineer

06/2023 - Present

UAE's largest insurance comparison platform (Superbrand status), serving 200,000+ policyholders with 40+ provider partnerships. Recognized as Digital Broker of the Year 2025 and Most Admired Company 2024 by Arabian Business.

- Led full-stack development and architectural design of a high-scale insurance technology platform, achieving 99.9% uptime and delivering enterprise-grade performance through scalable, secure solutions.
- Designed and optimized financial modules for premium calculations, improving system reliability by 60% and ensuring accuracy, scalability, and seamless integration with core services.
- Delivered payment gateway integrations with Apple Pay and Google Pay, improving transaction efficiency and achieving 40% faster page load times for enhanced user experience.
- Pioneered AI-driven development workflows, accelerating development cycles by 50%.
- Implemented advanced security protocols, building scalable backend architectures capable of handling 10,000+ daily transactions.

Nextbridge Ltd

Lahore, Pakistan

Senior Software Engineer

10/2021 - Present

Leading software development company delivering innovative, scalable enterprise solutions in logistics, e-commerce, and inventory management using modern technologies and agile methodologies.

- Architected scalable full-stack applications for enterprise clients using the modern JavaScript ecosystem, ensuring high performance, maintainability, and seamless scalability.
- Implemented advanced state management using Redux.js, optimizing data flow and performance in large-scale, high-traffic applications for improved scalability and maintainability.
- Developed scalable backend services using Node.js and optimized databases (MySQL, MongoDB), enhancing application speed and performance through efficient caching strategies and query optimization.
- Successfully integrated third-party APIs to enable seamless interoperability, enhancing system connectivity, data consistency, and overall application functionality.

Experience

Ecologix Pakistan

Lahore, Pakistan

Software Engineer

10/2018 - 09/2021

Innovative software company building cutting-edge web and fintech solutions with a focus on scalability, performance, and cross-border payment systems for global clients.

- Led frontend architecture for large-scale financing platforms, optimizing performance, scalability, and user experience across complex financial workflows.
- Developed advanced financial calculators and tools, achieving a 45% improvement in processing speed and enhancing accuracy in real-time computations.
- Delivered a full-stack e-commerce platform with secure payment gateways, improving operational efficiency and ensuring robust transaction security.
- Architected a full-stack POS solution for UK retailers, ensuring high reliability, seamless integrations, and enterprise-grade performance.

Projects

InsuranceMarket.ae

<https://insurancemarket.ae/>

UAE's largest insurance comparison platform (Superbrand status) serving 200,000+ policyholders with partnerships across 40+ insurance providers

- Architected and led full-stack development of a high-scale insurance technology platform serving 200K+ active policyholders across the UAE, leveraging React.js, Node.js, TypeScript, Express.js, Sequelize, MySQL, and MongoDB with 99.9% uptime and enterprise-grade scalability.
- Engineered complex financial modules for premium calculations, policy comparisons, and risk assessments using TypeScript and Sequelize ORM, resolving high-concurrency and query optimization challenges to boost system reliability by 60%.
- Integrated secure, PCI-compliant payment gateways including Apple Pay, Google Pay, Checkout.com, and TAP, and optimized performance through Redis caching, API tuning, and large-scale code refactoring – achieving 40% faster page loads and 50% faster API responses.
- Championed AI-driven development workflows using Cursor AI, Claude 4, and GitHub Copilot, accelerating delivery by 50%, enforcing enterprise coding standards, mentoring developers, and implementing advanced security and compliance protocols for 10K+ daily financial transactions with zero data loss.

LaptopZone

<https://laptopzone.us/>

Electronic devices sales management.

- Delivered a full-stack e-commerce platform for refurbished laptops (50K+ products) using React.js, Redux, Node.js, MongoDB, and Redis for real-time inventory and order management.
- Integrated PayPal and credit card gateways with fraud detection, ensuring secure and seamless payment transactions.
- Built admin dashboards for managing inventory, orders, analytics, and customer support with scalable backend APIs.
- Optimized queries and caching, achieving 30% faster load times and improved user experience across the platform.

FinanceThat.ca / FinanceThat.com

<http://financethat.com/>

Vehicle Financing Platform (Canada & US).

- Led frontend architecture and development of large-scale financing platforms using React.js and Redux, delivering responsive, mobile-first UIs with 40% faster load times through advanced optimization techniques.
- Developed financial calculators for loan comparisons and amortization schedules, enhancing decision-making and improving engagement across user journeys.
- Built multi-step loan application workflows with real-time validation and conditional logic, reducing abandonment by 35% and improving submission accuracy.
- Delivered admin dashboards for loan, user, and vehicle management with role-based access, achieving 45% faster processing and 99.8% transaction success.

Kyrio POS Dashboard

<https://dashboard.kyriopos.com/>

Point of Sale System (UK Market).

- Architected and developed a full-stack POS system using React.js, Redux, Node.js, and MongoDB for multi-location retail operations with real-time dashboards and analytics.
- Implemented multi-tenant architecture supporting configurable roles, permissions, and location-based management across stores.
- Built mobile-optimized POS interface with offline functionality for tablets and smartphones to ensure uninterrupted sales operations.
- Achieved 99.9% reliability while processing millions of transactions with minimal latency and real-time synchronization via WebSockets.

Projects

BoxCheck

<https://boxcheck.com/>

Order Management & Shipping Platform.

- Designed and implemented a microservices-based backend architecture using Node.js, improving system response times by 50%.
- Integrated FedEx APIs for real-time tracking, reducing shipping errors by 20%.
- Delivered 100% accessibility compliance, improving user adoption rates by 25%.

ISMO

<https://www.ismo.gov.pk/>

ISMO – Inventory & Sales Management Platform.

- Led frontend development with React.js and Tailwind CSS, creating an intuitive UI
- Achieved 40% faster load times through performance optimizations
- Delivered 100% accessibility compliance, improving adoption rates by 25%

Education

University of Sargodha

Lahore, Pakistan

Bachelor degree in Information Technology

03/2014 - 03/2018

Key Achievements

★ Achievements at INSURANCEMARKET.AE™ Successfully deployed the UAE's leading insurance comparison platform, achieving a 4.8/5 customer satisfaction rating from 26,000+ verified reviews. Recognized with 'Digital Broker of the Year 2025' and contributed to company accolades.	★ Achievements at Nextbridge Ltd Implemented enterprise-grade solutions that drove measurable client success, including a 30% reduction in order processing times for BoxCheck and a 25% increase in user adoption for ISMO.	★ Achievements at Ecologix Pakistan Platforms became leading financing solutions in Canada & US, boosting customer satisfaction and reducing drop-offs significantly.
